

## RE-INVENT YOUR HOTEL VENDING EXPERIENCE

Quality service is a pivotal factor to customer satisfaction; however, this has to be achieved with convenience, simplicity and cost in mind. Hotel Vending by AVS has been designed to help hotels (hotels, motels and short stay accommodation businesses) provide vending solutions tailored to guest needs that seamlessly integrate with existing processes. Our solutions ensure enhanced customer satisfaction combined with greater efficiency and lower operating costs.

### ✓ 24/7 Convenience

Hotel Vending offers a range of fully customisable vending machines that offer 24/7 convenience for essential travel and personal hygiene items, unattended fresh food, RSA compliant alcohol and of course snacks and drinks.

The vending machines are located in a centralised location within the safety of your property and guests are not restricted by store trading hours. The machines are customised to attractively merchandised the products that your guests want, while decluttering your reception area, freeing up staff and substantially improving stock control.

## The “New” Mini Bar

Hotel Vending is the new Mini Bar and is a game-changer for you and your staff. Say goodbye to restocking individual mini bars daily and say goodbye to unpaid consumed items. Our solution ensures all items are paid for and allows your team to see when inventory is running low, allowing them to focus on other important guest services.

Hotel Vending machines can be equipped with Alcohol Vending, a solution that allows premises to comply with RSA requirements though built in/programmable purchase limits, and verification that the user is over 18. Verification of age is done by a delegated responsible employees and once age has been verified, the guest is enabled to purchase alcohol from the vending machine. Just as guests can be enabled to purchase alcohol, they can also be disabled if they are no longer guests.

Guests who are not over 18 and have not been enabled /approved to buy alcohol, can still use the vending machine to purchase non-alcoholic products.

## Fresh Food Made Easy

In today's fast-paced world, guests are seeking convenience and healthy options during their stay. We have developed a revolutionary solution that will not only enhance your guests' experience but also increase your revenue and profits while streamlining your hotel operations. Cut back on costs and treat your guests to a vast selection of delicious, nutritionally balanced meals and food selections to satisfy all tastes and preferences. Our Smart Fridge Solution offers you 24/7 self-service convenience, accountability, and control over what you stock and how much you charge for the product. Whether your guests check in late or depart early or just want something to eat during unstaffed hours, our smart fridge solution allows you to offer this service.

The smart fridge is easy to use and offers guests the added benefit of being able to inspect a product and instantaneously return it of they don't want it. A video demonstrating how our smart fridge works [is available here](#).

Hotel Vending will ensure your guests can enjoy access to a wide range of refreshments and snacks 24/7. Whether it's a late-night drink or a sweet craving, our vending machine is at their service.
